PROFESSIONAL SUMMARY

Results-driven Senior Software Developer and Tech Lead with 11+ years of experience architecting and delivering high-impact digital solutions across e-Commerce, Auditing, and ERP sectors. Proven expertise in full-stack development, system automation, and scalable microservices architecture using Go, Node.js, Python, Java, and PHP. Demonstrated success in leading cross-functional engineering teams, bridging business requirements with technical execution, and maintaining high standards of code quality and system integrity.

WORK EXPERIENCE

Tech Lead Dec 2025 – Present

Nexora (Part of CBQA Global Group) — Jakarta, Indonesia

- Spearhead end-to-end development of internal and external enterprise platforms including Audit-Q, NexERP, OneAlpha, OneDataHub, and Odoo ERP
- Direct technical strategy, define architecture standards, and mentor a cross-functional engineering team
- Ensure system integrity, data security, and product scalability across all managed platforms
- Collaborate directly with stakeholders to translate business requirements into technical roadmaps

Senior IT Programmer Feb 2024 – Nov 2025

CBQA Global — Jakarta, Indonesia

- Led debugging, optimization, and feature development for mission-critical internal applications
- Engineered robust backend systems using Java Spring Boot and PostgreSQL
- Integrated complex third-party APIs and external data services into existing platforms
- Delivered strategic technical progress reports to key stakeholders and management

Full-Stack Engineer Nov 2022 – Feb 2024

Privat Talenta Indonesia — Jakarta, Indonesia

- Architected and deployed core website systems and a full CMS platform from the ground up
- Developed hybrid mobile applications for Android and iOS using Ionic Framework and TypeScript
- Enhanced platform reach, user engagement, and overall product performance

Product Development Team Lead & Engineer Dec 2015 – Feb 2021

Telunjuk.com — Jakarta, Indonesia

- Led development of "Compas" — a market intelligence platform for automated e-commerce price tracking and competitive analysis
- Optimized platform performance to sustain high-traffic loads and improve system reliability
- Improved core CMS SEO visibility resulting in significant organic traffic growth
- Delivered end-to-end e-commerce intelligence solutions adopted by major retail brands
